Overview

Regional context

Lincoln County is a rural county at the northern edge of the Palouse wheat-growing region. The economy is dominated by wheat production. The entire northern boundary of the county is a federal Indian reservation, and the county seat is in Davenport. The county is the seventh largest in the state, comprising 2,310 square miles.

Next to Whitman County, Lincoln County grows the most wheat in Washington state. Annual wheat production can be over 25 million bushels. One point two million acres of the county's 1.5-million-acre area is in farmland, and one in every three of those acres is planted with wheat. Lincoln County farmers are very efficient, and 2021 production was good. Wheat prices have increased substantially which has a large impact on county wholesale sales, retail sales and the overall level of money flowing through the economy.

Livestock production is also an important component of Lincoln County agriculture. A meat packing plant in Odessa has added diversity to agriculture income.

Tourism activities have increased over the last decade as Grand Coulee Dam and the Lake Roosevelt recreation areas have become more developed.

Local economy

Original settlers came to the area seeking gold, and those who settled in the area raised livestock. With the advent of the first railroad in 1881, overall agriculture production focused on wheat. Success in wheat farming eventually drove migration, settlement and development.

Growth in total nonfarm employment has been relatively slow over the last 12 years but had managed to minimize losses during the pandemic.

Geographic facts

	Lincoln County	Rank in state
Land area, 2010 (square miles)	2,310.49	7
People per square mile, 2010	4.6	37

Outlook

Schools and government employment constitute almost half of all jobs in the county. In the short term, ongoing budgetary problems are expected to continue to limit overall expansion of government. Lincoln County retail sales improved in 2021. However, even with the increase in total retail sales, overall sales tend to be lower relative to the per capita state average. This reflects the large number of purchases occurring in neighboring Spokane County as county residents travel to shop.

Slow population growth over the last decade limits overall economic growth. This is especially true in many small communities where support for services and the replacement of existing public infrastructure are hampered by a declining population. Overall, the population for the county tends to grow much slower and is older than is typical for the state and nation.

However, population should increase in 2022. The Amazon development in Spokane County is close to the border with Lincoln County and will provide the county new jobs and revenue as Amazon employees discover the low cost of land and housing available in Lincoln County.

Labor force and unemployment

Current labor force and unemployment statistics are available on the [Labor area summaries](#) page on ESD's labor market information website.

The average civilian labor force in 2021 increased to 4,729 which compares to 4,680 in 2020. The increase in the labor force was mainly due to more people moving to Lincoln County. A rural county, Lincoln was one of the first counties in the state to enter the phase three business re-openings because of the low incidence of the virus (COVID-19) in the county.

The county unemployment rate in 2021 averaged 4.8 percent, which is a decrease from 2020 (6.7 percent). The unemployment rate fluctuates throughout the year, reflecting seasonal employment, with lows in the summer and highs in the winter.

Industry employment by age and gender

The Local Employment Dynamics (LED) database, a joint project of state employment departments and the U.S. Census Bureau, matches state employment data with federal administrative data. Among the products is industry employment by age and gender. All workers covered by state unemployment insurance data are included; federal workers and non-covered workers, such as the self-employed, are not. Data are presented by place of work, not place of residence.

Lincoln County highlights:

The largest job holder group by age in Lincoln County in 2020 was the 55 to 64 cohort with 22.4 percent of the workforce. This group was followed closely by the 45 to 54 cohort at 21.3 percent. In 2020, 50.0 percent of all industry jobs were held by men and 49.9 percent were held by women.

Industry differences are discussed below:

- Male-dominated industries included agriculture (77.4 percent), construction (85.6 percent), transportation and warehousing (76.2 percent) and wholesale trade (72.1 percent).
- Female-dominated industries included professional, scientific and technical services (83.5 percent), finance and insurance (80.9 percent), health care and social assistance (75.2 percent), and accommodation and food services (71.3 percent).

Personal income

Personal income includes earned income, investment income and government payments such as Social Security and Veterans Benefits. Investment income includes income imputed from pension funds and from owning a home. Per capita personal income equals total personal income divided by the resident population.

In 2020, the per capita income was \$50,851, which was well below the state's per capita income of \$67,126 and the nation's per capita income of \$59,510.

Median household income over the period 2016 to 2020 was \$58,584, well below the state's \$77,006.

Over the period 2016 to 2020, 11.4 percent of the population was living below the poverty level in Lincoln County. This compares to 9.5 percent of the state.

Population

Lincoln County's population was 11,232 in 2021. An increase from 2020 of 3.3 percent. The increase was due to the Amazon development and low land cost.

The largest city in Lincoln County is Davenport.

Population facts

	Lincoln County	Washington state
Population 2021	11,232	7,738,692
Population 2020	10,876	6,705,281
Percent change, 2020 to 2021	3.3%	0.4%

Age, gender and ethnicity

Lincoln County, as a percent, had a much older age demographic than the state or nation in 2021.

- Lincoln County's population age 65 and older was 25.9 percent in 2021 compared to the state's 15.9 percent and the nation's 16.5 percent.
- The youngest age group, under 5 years, was 5.4 percent in 2021 compared to the state's 6.0 percent.

Within Lincoln County, there is less diversity than the state. White individuals who are not of Hispanic descent made up 93.8 percent of the county's population compared to 78.5 percent of the state's population.

Demographics

	Lincoln County	Washington state
Population by age, 2021		
Under 5 years old	5.4%	6.0%
Under 18 years old	21.7%	21.8%
65 years and older	25.9%	15.9%
Females, 2021	49.1%	49.9%
Race/ethnicity, 2021		
White	93.8%	78.5%
Black	0.6%	4.4%
American Indian, Alaskan Native	2.0%	1.9%
Asian, Native Hawaiian and other Pacific Islander	0.6%	10.4%
Hispanic or Latino, any race	3.6%	13.0%
